## INTRODUCTION

Imagine a personalized deck of playing cards with pictures of your friends and family! Or a board game with your child's picture and name on the box cover and images of family members on the board! Doctor Finn's Card Company specializes in the small run manufacture (no minimum order) of customized playing cards, custom board games, and custom card games. All custom products are reasonably priced with a quick turnaround time.

## CUSTOM PLAYING CARDS

### Prices

*Price per Deck:* **Each deck costs only \$9.** In addition, there is a one-time set-up fee for each unique order (see below). A **discount of \$1** per deck applies to orders of **25-49 decks**. For orders of **50 decks** or more, **take \$2 off each deck**.

*Set-up Charge:* The one-time set-up charge is based on the number of unique images and whether you are customizing one or both sides. (The "front" has the suits and numbers).

Custom Back with Standard Front is only \$15

Custom Front and Custom Back with...

1-4 images is \$26

13 images is \$32

54 images is \$45

Custom Fronts with a Standard Back, subtract \$10 from above

*Shipping:* Orders will be shipped within 3 weeks of payment. In most cases, I send them within 2 weeks. For 1-3 Decks: \$8. For 4-25 decks: \$14. For 26-50 decks: \$22. For more than 50, contact Dr. Finn's for shipping price.

*Special Packaging:* All custom playing cards are packaged in a re-sealable plastic bag at no charge. If you would like a hard plastic gift box, there is an additional charge of \$1 per box.

### Quality

Dr. Finn's specializes in making high quality custom playing cards in low quantities and at low prices. If you want the absolute highest casino quality playing cards, you will usually have to order at least 100 decks OR you will have to pay a very high price. Doctor Finn's goal is to find a happy medium between high quality and price. My cards perform well as playing cards, are excellent novelty items, and make great gifts. Free samples will be sent upon request. Here's a brief summary of the positives and negatives.

POSITIVES: Shiny Coated Cardstock, Shuffle Well, Sharp Images, Firm and Durable, Low Cost, Die Cut to Exact Size, No Minimum Order

NEGATIVES: Not Professional Casino Cardstock, No Plastic Coating, Cannot Bleed Image to the Edge on Both Sides

#### How to Prepare Images for Custom Orders

*Need Help?* If you do not understand what the following information means, please feel free to shoot us an e-mail or give a call. We can also adjust your images to meet the specifications at no charge.

*Digital Format:* Doctor Finn's only accepts digital images (no original photographs). Any digital format that is compatible with Photoshop is acceptable, such as jpeg or psd files.

*Specifications:* The cards are printed at 300dpi. The frontside image space on poker cards is 1.5" x 2.5". If you are designing the entire card, designing the backsides, or ordering a custom game, the image space is 2.125" x 3.125". The cards themselves are 2.5" x 3.5". Hence there is a border around the image. The border may be white or any solid color of your choice. If you want to bleed one side of the cards, it is possible, but talk to us over email or phone.

*Special Packaging:* All playing cards are packaged in a re-sealable plastic bag at no charge. If you would like a hard plastic gift box, there is an additional charge of \$1 per box. All *games*, both board and card, are packaged in a rigid set-up box that is customized for you.

#### How to Place an Order

Once the images are ready, please contact Steve at the above email address or phone number.
